ORTHODONTIC INFORMED CONSENT FORM

For: .....

This document provides
including the potential risks and limitations, your responsibilities as a patient, and our financial policies. By signing this form, you acknowledge that you have read and understood these terms and agree to them before treatment begins. While we aim for the best results, your full cooperation is crucial for a successful outcome.
Please note that it is impossible to list every possible circumstance, but the following represents our best estimate of the information you need.

Patient's Responsibility

Best orthodontic results are generally achieved by patients who understand their treatment goals and know what to do to fully participate in their orthodontic treatment. It is your responsibility:

To follow oral hygiene instructions and adhere to food restrictions so no harm comes to your teeth, tissues, or orthodontic appliances.

- To be present for all appointments in a timely manner.
- To wear elastics, retainers, and headgear if they are necessary to achieve best results.
- To visit your general dentist at least every six months for an examination and cleaning.

Eating Habits

Please be mindful of the types of food you can eat and the manner in which you eat them. Fizzy drinks and sugary foods cause decay and are harmful to your teeth. Hard (e.g., bone, plantain chips, fried yam, roasted corn, popcorn, nuts, potato chips, lollipops), Sticky or Chewy foods (e.g., chewing gum, jelly), can damage braces components like the rubber bands, wires, or even the bracket itself .
Foods that are usually bitten into such as bread, carrots and apples should be cut into thin slices and chewed with your back teeth.
Not adhering to this will result in broken appliances which may delay the progress of treatment.

Oral Hygiene

Decalcification (white spots), tooth decay (holes in your teeth) or gum disease may occur if brushing or flossing are not done properly, regularly, and thoroughly during your treatment period.
Orthodontics treatment requires you to rinse your mouth and brush your teeth after every meal with a medium bristled toothbrush and fluoridated toothpaste.

Root Resorption

In a few cases, the ends of some of the teeth are shortened during treatment. In the event of subsequent gum disease, this shortening could reduce the longevity of affected teeth.
Under healthy conditions, the shortened teeth usually suffer no disadvantage

Treatment Time

Our estimated treatment time is our best guess as to how long treatment will take. Progress can be delayed by abnormal facial growth, tooth moving mechanical difficulties, poor appliance wear cooperation, broken appliances and missed appointments.

Devitalization

It is possible for the nerve inside a tooth to die during treatment thus requiring a root canal on the affected tooth. The most common cause of this problem is that the tooth received some sort of trauma such as a blow or a large cavity sometime in the past.

Extraction

Some cases will require the removal of primary (baby) teeth or permanent teeth. There are additional risks associated with the removal of teeth which will be discussed with you if required.

Replacement

Prior to treatment or in the course of treatment, if you need to replace your missing tooth/teeth; it will be communicated in due time.
NB: This cost is different from your orthodontic treatment cost.

TMJ Dysfunction

Some patients may develop jaw joint noises, discomfort and facial pain related to the jaw prior to, during or after treatment. The current belief is that these problems are caused more by habitual grinding of the teeth rather than the way in which the teeth bite. If such a problem arises, treatment by another specialist may be required.

Injury From Appliances

Some orthodontic appliances, such as a headgear, can be injurious. If any appliances we consider being potentially injurious are prescribed, we will be sure to inform you of this potential and will expect our instructions to be followed carefully.
NB: In case of any injury or complications, you need to contact us for direction.

Relapse

We intend to obtain the best result possible. Some orthodontic problems, however, tend to return to their original condition to a small degree. Careful cooperation during the retention phase of treatment will keep this relapse to a minimum.

Additional Treatment

Unforeseen circumstances (such as abnormal growth or gum disease) may cause us to recommend a form of additional treatment not previously discussed. If this occurs, we will carefully explain the reasons for a change in the treatment plan and any extra fees before proceeding.

ADDITIONAL POLICIES

The information below is essential for your full understanding of our treatment agreement, including patient responsibilities and financial obligations.

Transfer Policy

In the event a patient transfers from the practice prior to the end of treatment, the treatment fee will be adjusted for services rendered to date. The treatment fee to date will be determined according to our standard banding fee and payment schedule, regardless of the individual payment plan. We are required to maintain all original records once treatment has been started; therefore, we must charge a fee for duplicating your records and transferring them to your new orthodontist.
Records will not be transferred prior to account settlement.

Excessive Appliance Breakage

If the patient has a loose band or bracket or a broken appliance, we ask that you contact our office as soon as possible so the appropriate appointment can be scheduled.
Excessive or repeated damage to orthodontic appliances (e.g., brackets, wires, bands) due to a patient's failure to follow instructions or adhere to food restrictions will incur additional charges. Each repair may be subject to a fee.These fees are separate from the overall treatment cost and must be settled at the time of the appointment to ensure treatment progress is not delayed.
NB: This fee can not be added to your orthodontic treatment cost.

Payment Plan And Policy

The total cost of your orthodontic treatment will be communicated to you before treatment begins. To ensure a smooth and predictable financial arrangement, we have established the following payment plan:

- An initial down payment of **30% of the total amount charged** is required before the commencement of any treatment.
- A payment of **GHC 1,000** is due at each subsequent review or appointment until the total treatment fee is paid in full.
- You can also opt to make full payment before treatment.

ALL RIGHTS RESERVED COPYRIGHT 2025 | FRAMADA DENTAL CLINIC

Note: If you anticipate being unable to make the full **GHC 1,000** scheduled appointment, you must inform our office before the appointment date. We cannot proceed with a review or adjustment without an accompanying payment.

Should this payment plan be unsuitable for your financial situation, you have the option to file for a change. You must discuss and agree upon an alternative payment plan with our administrative team before any treatment is initiated.

Rentention

After every orthodontic treatment requires an Orthodontic Retainer which comes with an extra cost at the end of the treatment. Price of the Retainer will be determined at the end of the treatment. Failure to do Retainers at the end of the treatment could lead to potential relapse.

Consent To Use Records

I hereby give my permission for the use of orthodontic records, including photographs for purposes of professional consultations, research, education, or publication in professional journals.

By my signature below I acknowledge that I have read the ORTHODONTIC INFORMED CONSENT and may receive a hard copy of the form at my request.
